Hi Felicia:

It is my pleasure to be able to share these informative presentations with you. Tim forwarded five additional presentations (attached) from this technical program. These presentations include ones provided by AWWA and WRF staff, information on one of the three likely treatment process options (reduction/coagulation/filtration), laboratory analysis and occurrence data for hex-chrome, and a case study from Hinkley California.

We were very fortunate to have such good presentations in this program. We are currently developing a shorter (six presentations) technical program for our spring conference in Anaheim that will include additional presentations from participants who were not able to participate in our Annual Fall Conference technical program. I can probably send copies of these presentations as well sometime in April 2014.

Sincerely,
Craig Thompson

Thank you Craig--I really appreciate you remembering!
Felicia

Sent from my iPad so hope autocorrect was at least humorous Felicia

> It was a pleasure to meet you (briefly) at the breakfast event during the California-Nevada Section AWWA Annual Fall Conference in Sacramento. I am sorry that my prior time commitment prevented me from staying through your presentation. As I mentioned, I had to leave the breakfast meeting before 8:00 am to moderate the SDWA Committee (on which I current serve as chair) technical program on hexavalent chromium.

>

> Since you expressed an interest in this technical program, I am sending pdf copies of three of the presentations that I have received thus far and will send two others (that include fairly large files) in a second email message. I will forward the 7 other presentations when they are available. Please let me know if there is any additional assistance that I can provide.
